fish: Unknown command: brew & Laravel installer

Si brew ne fonctionne plus sous fish:

```
fish: Unknown command: brew
```

Excécuté la commande suivante:

```
fish_add_path /opt/homebrew/bin
echo "/opt/homebrew/bin/fish" | sudo tee -a /etc/shells
chsh -s /opt/homebrew/bin/fish
```

stackoverflow

Laravel intaller

Pour installer laravel installer on procéde comme suit:

```
composer global require laravel/installer
fish_add_path /opt/homebrew/bin
```
